

**GREENTECH
GLOBAL**

Indoor Air Quality Engineering & Integrated Systems
Real-Time Environmental Monitoring
Factory-Direct Sourcing for Critical Building Systems

WHO WE ARE

Greentech is a global indoor environmental engineering firm dedicated to healthier indoor environments. Since 2010, we've completed 9,000+ projects across Asia and North America, supporting 40% of Fortune 100 firms and 30+ international schools. Our multidisciplinary team delivers end-to-end solutions through scientific analysis, advanced technology, and proven strategies. We serve clients in real estate, healthcare, education, government, and high-end residential sectors, enhancing health, energy efficiency, and occupant satisfaction.

CORE COMPETENCIES

✓ CBRN / Hazmat Engineering Facility Readiness:

Design and execution: pressurized clean zones, HEPA filtration systems, PPE storage solutions, and decontamination flow management

✓ Hazmat/Disaster Planning and Response:

Preparation for and remediation: mold, asbestos, lead, flood, fire, and chemicals.

✓ Indoor Air Quality Solutions:

Modular and central HVAC filtration, ventilation, UVGI, and pressurization

✓ Real-time Environmental Monitoring and Automation:

Deployment of sensors for air, water, light, and sound quality; energy and vibration. Integration to BMS for automated operation

DIFFERENTIATION AND EXPERIENCE

- 15 years of IEQ industry leadership
- Global coverage, local execution through network
- Winner of CBRE APAC "Best Client Value" Award (2021)
- 9,000+ projects, including 40% of Fortune 100 multinationals
- Turnkey EPC capability: Design–Procure–Install–Maintain
- SDVOSB Certified: Founder is a U.S. Army LTC with 24+ years in scientific consulting and NBC operations

NAICS (CAGE: 11XN7 | UEI: T5MDB8GEQJL1)

- 541620 – Environmental Consulting Services
- 541330 – Engineering Services
- 562910 – Remediation Services
- 333413 – Air Purification Equipment Manufacturing
- 423730 – Heating & A/C Equipment Wholesalers
- 236220 – Commercial & Institutional Building Construction

SDVOSB certified | SDB-certified

REPRESENTATIVE PAST PERFORMANCE

1. Asbestos, mold, and chemical remediation with containment
2. Air quality and filtration retrofits for post-fire & post-flood environments
3. Advisory role for international embassies, critical infrastructure, and disaster-prone public buildings
